NPM Assignment

Step 1:

In first step I have set-up Nodejs in my system by "curl -fsSL https://deb.nodesource.com/setup_16.x | sudo -E bash -" this command and then install it by "sudo apt-get install -y nodejs" this command.

Step 2:

After that I have checked whether Nodejs and NPM is installed correctly or not by using "node --version" and "npm --version" commands.

Step 3:

Then after setting up Nodejs and NPM, I updated the system so that it can install the latest version of angular by using the command "sudo apt update" and after that I installed Angular by using the "sudo npm install -g @angular/cli" command.

Step 4:

After that I installed React by using the command "sudo npm -g install create-react-app" and then I checked whether it was installed correctly or not by using the command "create-react-app --version".

Step 5:

After the React installation, I installed Vue by using the "sudo npm install -g @vue/cli" command and then I checked whether it was installed correctly or not by using the "vue --version" command.

Step 6:

Atlast I installed Vue by using the command "sudo npm install -g @ionic/cli" and then I checked whether it was installed correctly or not by using the command "ionic --version".
